**Kingsky Flight Academy puts you on
a Fast Track to be a professional Pilot**

Multi Engine Course

The multi engine rating qualifies you to fly "twins," or airplanes with more than one engine.

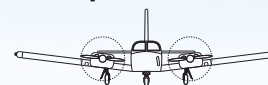

The multi is a virtual necessity for pilots planning a career in aviation. To others, it's still a fun and interesting challenge to undertake. Some people fly twins — which tend to be faster and carry more load than single engine airplanes — for personal and business use.

Twins also offer the reassurance of a second engine, especially when flying at night, in poor weather, or over water or mountains.

Price List Part 141 - Multi Engine Course
